Multiple Socket GU

Calix's multiple sockets facilitate the installation of our pre-heating systems. There are two models available, both of which are dual voltage, meaning they are both 120V and 250V.

The GU403 has two outputs, and GU405 has three outputs for a smart and easy installation. The outputs allow you to choose which direction to attach the SK cables, and the third output on the GU405 can be used to connect a Calix battery charger.

In addition, the GU405 comes with two protective caps. The cap should only be removed on the active output so as to keep the inactive output protected.

Specs

GU403
WxLxH (mm): 50x80x26
250V~ 16A
110-120V~ 15A, max 1800W
0,04kg
IP46

GU405
WxLxH (mm): 55x57x27
250V~ 16A
120V~ 15A, max 1800W
0,055kg
IP46
