Heating protection

Heating protection from Calix should be used when the heater is installed within 55mm of the manifold or the turbocharger.

Calix offers two types of heating protection: one is the protective sleeve, and the other is the heat guard. The latter is available in two versions as one is designed to fit double heating coils and one is designed for single heating coils.

SLEEVE (200mm)
P/N: 1762413

HEAT GUARD
P/N: 1769001 FOR SINGLE HEATING COIL
P/N: 1353730 FOR DOUBLE HEATING COIL
