WORKSHOP CHARGER 12V/100A

The new Workshop Charger from Calix is a great tool for workshops that need a powerful charger, especially for diagnostics and software updates in vehicles.

The compact and light-weight device is capable of supplying 100A continuously, and 120A for 90 seconds.

It is short-circuit proof as well as reverse-polarity protected, making it safe to use.

The charger is user-friendly and easy to install. Simply connect the battery to the charger, choose your battery and the charger will do the rest of the work.

Quick, safe and easy!

TWO VERSIONS

The workshop charger will be available in two versions:

P/N: 1753940	Workshop charger with 2m 12V cables
P/N: 1753945	Workshop charger with 5m 12V cables

Both types come with powerful battery clamps (P/N: 2302317) that can be purchased separately as a spare part.

The Workshop Charger can also be attached to the wall with a wall mount (P/N: 2302313).
