Quick installation of a Calix system

With a mounting bracket from Calix there will be an easy and quick installation of the inlet cable (MK).

The mounting bracket is mounted in the holder of the car's numberplate and thereafter the inlet cable (MK) is mounted with the expander (part. no. 1454401). The installation is completed by taking the inlet cable through the grill.

The mounting bracket is universal and suitable for most modern cars with numberplate.

The bracket is delivered in a packet of 10 pcs.
